- Gdańsk, PL

EDUCATION

Data Engineer

Gdańsk University of Technology
2024 - present

Programming Technician

Technic School "Elektryk" in Słupsk
2019 - 2024

SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: Vue.js, Nuxt 3, React, TailwindCSS, PrimeVue, ChakraUI

Backend: Node.js, FastAPI, Supabase

Data: MySQL, PostgreSQL, T-SQL

Tools: Docker, Git, GitHub, Jira

Design: Figma, Adobe Xd, Adobe Photoshop

LANGUAGES

English - C1 level (Cambridge CAE Certificate)

Polish - Native

ABOUT ME

Motivated Fullstack Developer with a strong focus on modern component-based frameworks. Experienced in building responsive, containerized applications using TypeScript, Tailwind CSS, and Docker. Passionate about clean code and efficient data handling. Eager to leverage my skills in building scalable web solutions in a commercial environment.

PROFESSIONAL EXPERIENCE

Frontend web developer internship

Vitalis Gut-Wehlitz | Leipzig, Germany

Oct 2022

- Developed a personal website, ensuring cross-browser compatibility and responsiveness.
- Designed and optimized graphical assets for web usage using Adobe Photoshop and Illustrator/Xd.
- Collaborated with the team in an international environment, improving communication skills and adaptability in agile workflows.
- Gained hands-on experience in translating design concepts into functional user interfaces.

SELECTED PROJECTS

Business landing page with CMS (Commercial)

jenglischschool.pl

Vue.js, Nuxt, Supabase, TailwindCSS

- Designed and delivered a fully functional website for a private client, managing the entire lifecycle from requirements gathering to deployment.
- Developed a custom CMS enabling independent content management by the site administrator.
- Integrated an external Booking System API, ensuring seamless data synchronization between the website and the third-party provider.

Finance management application

github.com/M4TI-H/PennyTracker

Vue.js, FastAPI, MySQL, TailwindCSS

- Engineered a full-stack financial application, bridging a responsive Vue.js frontend with a high-performance FastAPI (Python) backend.
- Designed a RESTful API architecture to manage secure data flow, ensuring reliable storage and retrieval of user transactions in a MySQL database.
- Developed a scalable codebase prioritizing clean architecture, laying the foundation for future implementation of advanced data analysis features.
- Created an intuitive user dashboard with Tailwind CSS, allowing users to track and visualize their financial status in real-time.

E-commerce platform

github.com/M4TI-H/lazur

Vue.js, Nuxt, Supabase, TailwindCSS

- Architected a scalable full-stack application using Nuxt 3, focusing on component reusability and maintainable code structure.
- Implemented global state management with Pinia to ensure efficient and predictable data flow across complex application routes.
- Integrated Supabase ecosystem to handle secure User Authentication and perform real-time database operations.
- Designed a responsive and modern UI using Tailwind CSS, optimizing the interface for performance and user experience across devices.
